Comments:	Reviewd and corrected version		
1	1	Alexandre Cotting, Ivan Eggel, Katja Mayer, Henning Mueller	22/11/2010
Comments:	Last format correction		

Table of Contents

1.   Deliverable Objective

This deliverable consists of providing an initial version of the Khresmoi website[1].

The web site should contain a section with a list of publications and also press releases and articles in the popular press. A list of the first press releases should be given in the deliverable. All public deliverables will be available as PDF files from the web page. The web site should also include an RSS feeder with news on the project that will be updated regularly.

2.   Description of the architecture

A first information exchange was performed between all partners to get an overview of the different CMSs (Content Management System) available and being used, resulting in Joomla, Drupal and Silverstripe. After a comparison of the three tools, Silverstripe was considered easier to implement and use. The two other tools may have more options but Silverstripe covers those important for the project.

Therefore the solution for the public KHRESMOI website consists of the Silverstripe CMS coupled with a MySql database.

The main reasons for the choice of Silverstripe were the following:

- intuitive user interface;
- easily extendable;
- large number of additional modules;
- helpful tutorials available;
- active user community;
- open source;
- free of charge.

The CMS itself is written in PHP running on an Apache web server. For the operating system the decision was in favor of Suse Linux Enterprise Server 10 SP3, which was installed on a virtual machine hosted by the IT Service of the HES-SO in Sierre, Switzerland.

The KHRESMOI website is reachable at: http://www.khresmoi.eu

3.   Web site content

The Home page contains the main objectives as well as the expected impacts and different facts. On this page are the links to the Events and Glossary pages as well as the latest news.

The **Overview** page answers the questions What? For Whom? Why? and How?

The **Use Cases** page displays information related to the use cases in Medical information and Radiology.

The **Consortium** page contains all the names, links and logos of the different partners.

---

[1] The final version of the website is foreseen for the end of the project, therefore in month 48.

The **Resources** page contains all the publications and deliverables created during the project lifetime. It will later be expanded to include open source software, databases, etc. created as a result of the project.

The **Media Center** contains all documents necessary for a good dissemination of the project: fact sheets, press releases and other media links.

The **Contact Us** page displays the main contact information for interested visitors.

The following sections are specific sub-pages of the list in the deliverable description (Section 1):

Section with a list of publications: http://www.khresmoi.eu/resources/publications/

Section with press releases and articles in the popular press: http://www.khresmoi.eu/media-center/

All public deliverables are available as PDF files from the web page:

http://www.khresmoi.eu/resources/deliverables/

The web site includes an RSS feeder with news on the project and will be updated regularly:

http://www.khresmoi.eu/news

4.   List of the first press releases

Press releases available in October 2010:

- EN: eHealth: When transparency and reliability matter (August 2010) ;
- DE: eHealth: Neue Ansätze zur Verbesserung von Transparenz und Zuverlässigkeit von Online Information (August 2010);
- DE: Project Kick-Off Meeting in Vienna Press Release (September 2010).

The following general project fact sheets were distributed with the press releases and are available for download on the website:

- English Fact Sheet;
- German Fact Sheet;
- French Fact Sheet.

Kreshmoi has already received media attention. Articles are collected online in the media repository:

EN:

- Knowledge Helper for Medical and Other Information users CORDIS (8/13/2010).

DE:

- eHealth: Neues EU-Projekt entwickelt Plattform für Gesundheitsinformationen, EHealth.com (09/24/2010);
- Ein Skalpell für den Onlinedschungel, Austria ORF Online Science (10/11/2010);
- Wissen Aktuell: Verlässliche Medizin-Information im Internet, Austria Ö1 Radio (10/11/2010);
- Ein Google für die Medizin (page 1, page 2) Die Presse (10/27/2010).
